

## DIAGNOSTIC ASSESSMENT

The purpose of diagnostic assessment is to support the Child Study team in planning appropriate interventions based on the student's strengths and weaknesses.

Check the areas of concern that further diagnostic testing is needed:

- Concepts ( age 3 – 6)
- Memory
- Visual and Auditory processing
- Phonological processing
- Learning style
- Attention and focus
- Play based assessment
- Classroom observation/ General Observation Check List
- Social/Emotional
- Language
- Sensory Processing
- Motor

### Parent/Guardian Consent:

I give consent for the above checked diagnostic assessments to occur for my child. I understand that the results of this diagnostic testing may be used for the determination of future special education eligibility. If special education eligibility is considered, further parent consent is required.
